### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the recited semiconductor element wherein a plate-like current path material connects at least one electrode of a semiconductor element with at least one bonding pad of a lead frame with a middle portion formed in an arch shape having predetermined curvature.

The prior art also does not teach or suggest the recited method of manufacturing a semiconductor device including forming a plate-like current path material connecting an electrode of a semiconductor element with at least one bonding pad of a lead frame with a middle portion formed in an arch shape having predetermined curvature.

European Patent Application EP 1 191 589 discloses a plate like current path 51, but specifies in column 13, beginning on line 28 that the current path is composed of straight segments bent into the desired shape.

Cheah et al., U.S. Patent No. 6,040,626, discloses a semiconductor package having a lead frame and plate like current path but does not disclose that there is a middle arch shaped, curved portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
